

HIDESIGN

Brand Fact Sheet

For over 30 years Hidesign has been hand-crafting leather bags and accessories of the highest quality. Leading the market, our products have captured the hearts of retailers and consumers alike with their character and charm. Our aim throughout has been to create superior quality products without sacrificing hand-crafted traditions.

This season we launch a collection of Hidesign bags which celebrate our heritage. Using a contemporary design edge and new leathers, this exclusive collection of bags gives Hidesign an updated look for the future.

Most of our designs are vegetable tanned which brings out the natural texture and rugged feel of the leathers selected. The dye is hand-rubbed into the leathers, to give character and achieve a rich, deep colour.

Hidesign bags are constructed in a workshop where craftsman work in groups as opposed to production lines. This allows the bags to be made with the devotion they deserve and creates bags with true individual character.

A collection of everyday essential accessories for men is also designed to sit alongside the main range and includes wallets and travel accessories

The Hidesign website, www.hidesign.co.uk is seasonally updated with the latest collections.
